## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 805 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 805 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. **DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-7 and 9 are allowed.
2. The following is an examiner's statement of reasons for allowance:
  - (1) Regarding claims 1-7:

The present invention describes a signal timing adjustment device, comprising a voltage generating section for generating a plurality of adjustment voltages; a voltage selecting section for selecting, from the plurality of adjustment voltages, an adjustment voltage for each of a plurality of circuit blocks in an integrated circuit that is in accordance with a delay-time adjustment amount, which is set so that delay time of each circuit block in the integrated circuit becomes closer to an average value of the delay time of all of the plurality of circuit blocks, the delay time being time between an input of data to a circuit block and an output of the data from the circuit block; and a delay-adjustment section for increasing or decreasing the delay time of each circuit block by using a transistors at which threshold voltages change voltages change in accordance with values of the adjustment voltages selected. The closest prior art Yamamoto et al. (US 6,424,184 B1) in view of Yamada (US 5,912,591) disclose a similar system but fail to disclose the setting of delay-time adjustment so that delay time of each circuit block in the integrated circuit becomes closer to an average value of the

delay time of all of the plurality of circuit blocks. This distinct feature has been added to independent claims 1, 3, and 7, thus rendering claims 1-7 allowable.

(2) Regarding claim 9:

The present invention describes a computer program product comprising a computer readable storage medium, having encoded thereon computer readable program instructions executable by computer that cause the computer to adjust signal timing for a plurality of circuit blocks of an integrated circuit by directing performing the steps of measuring a delay time between an input of data to each circuit block and an output of the data from said each circuit block; determining an average value of the delay time of all of the plurality of circuit blocks; generating a plurality of adjustment voltages for increasing or decreasing the delay time of each circuit block by changing threshold voltages of transistors; setting a delay-time adjustment amount so that a difference between the delay time of each circuit block and the average value becomes smaller; an selecting, from the plurality of adjustment voltages, an adjustment voltage that is in accordance with the delay-time adjustment amount. The closest prior art Yamamoto et al. (US 6,424,184 B1) in view of Yamada (US 5,912,591) disclose a similar system but fail to disclose determining an average value of the delay time of all of the plurality of circuit blocks and setting a delay-time adjustment amount so that a difference between the delay time of each circuit block and the average value becomes smaller. This distinct feature has been added to independent claim 9, thus rendering claim 9 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
